

Standards of charges and fees

□ Principles of “filling the expenses”

Administrative fees shall be set according to the direct cost of goods and materials, wages and salaries, and other costs, and by taking indirect cost into consideration. The collection of fees is based on the principles of “filling the expenses” in order to reflect the direct and indirect costs to the government to provide the service.

□ Principles of “recovering the costs”

User charges shall be set according to the costs of development, procurement, operations, maintenance, improvement, management and other related factors, and by taking market factors into consideration. The collection of fees is based on the principles of “recovering the costs”, similar to the “price” characteristics of a market economy.
