

Nutrition Facts Labeling Example for Alcoholic Beverages (Web Version and Container Version)

※ Nutrition Facts Labeling Example [Web Version]

The nutrition facts for [Company Name] alcoholic beverages are as follows:

Name of the brand	Volume (milliliter)	Alcohol content (%vol)	Nutrition Facts (per 100 milliliters)					
			Calories (Kcal)	Carbohydrate (gram)	Sugars (gram)	Protein (gram)	Fat (gram)	Sodium (milligram)

Instructions:

1. Alcohol producers and importers are encouraged to voluntarily disclose nutritional information for flavored alcoholic beverages with an alcohol content of 7% or lower on their official websites or on the beverage containers. This information should include at least calorie content and sugar content to meet consumer informational needs.
2. The aforementioned nutritional information may or may not be labeled with the term "Nutritional Information" and can be presented in any format, not necessarily in a tabular form.

※Nutrition Facts Labeling Example [Container Version]
